AI Recommendations

What's Missing

The website has reasonable digital presence but there are opportunities for improvement across multiple dimensions.

Why Improvement Needed

With over 60% of web traffic coming from mobile devices, a non-mobile-friendly website is driving away potential customers. Mobile optimization is no longer optional - it is essential.

How Conversions Can Improve

- Improve page load speed to reduce bounce rates
- Add clear calls-to-action above the fold
- Optimize mobile experience for on-the-go conversions
- Implement live chat or chatbot for instant customer engagement
- Add social proof elements like testimonials and case studies

Why Redesign Needed

The current website quality score indicates significant room for improvement in design, usability, and overall user experience. A modern redesign would not only improve aesthetics but also enhance functionality, load times, and conversion rates.

Why SEO Needed

SEO is essential for any business looking to be found online. Even basic SEO improvements can lead to significant increases in organic visibility and qualified leads.
