AI Recommendations

What's Missing

The website has reasonable digital presence but there are clear opportunities for improvement across multiple dimensions.

Why Improvement is Urgent

With over 60% of web traffic coming from mobile devices, a non-mobile-friendly website is actively driving away potential customers every day.

How Conversions Will Improve

- Improve page load speed to reduce bounce rates significantly
- Add clear calls-to-action above the fold on every page
- Optimise mobile experience for on-the-go conversions

Why a Redesign is Needed

While functional, refining the user experience and aligning with modern design standards will improve competitive positioning.

- Implement live chat or chatbot for instant customer engagement
- Add social proof elements like testimonials and case studies

Why SEO is Essential

Strong SEO opportunity identified. Proper optimisation can drive consistent organic traffic, reduce acquisition costs, and build long-term digital assets with compounding returns.
